

The recommendation of the Consumer Agency accident investigation...
“New product packaging should be investigated in order to prevent future accidents”

Minister of Health, Labour and Welfare Mr. Shiozaki “Press conference after the Cabinet meeting” (12.22.2015)

At the press conference on December 22, 2015, there was a question and answer session. The Ministry of Health, Labor and Welfare said that they are currently investigating measures to prevent accidental poisoning incidents, such as requiring child resistant packaging. Awareness of the widespread problem will also be raised through local governments and the healthcare system.

Coverage in the media:
“Recently developed ESOP can replace PTP.”

Industry officials Attention!

Simple Medicine Dispensing

Tablet packaging revolution

New Design to Replace Press-Through-Pack (PTP)

Novel Soft Tablet Packaging

ESOP

Easy Seal Open Pack

ESOP is a new soft packaging for tablets to replace Press-Through-Packs (PTP), also known as blister packs. ESOP is made using MORIMOTO's patented technology which allows creation of soft and transparent packaging with "easy open seals". The innovative soft design is safe to the gastrointestinal tract in the case of accidental ingestion.

Morimoto Pharma is looking for partners for future ESOP projects

Morimoto Pharma has completed the launch of the next generation soft tablet packaging, ESOP. We are committed to creating combination products with pharmaceutical industry partners and medical care professionals. If you are interested in potential collaborations/innovative uses regarding ESOP, please contact us via the information provided below.
